Dark Sky Legacy George Reed, 2010-12-30 The way mankind has responded to the dark sky throughout history has determined humanity's scientific - and cultural - progress. In this way, astronomy is in some way connected to everything. This fascinating theme is explored in *Dark Sky Legacy*. George Reed examines the powerful influence of the cosmos on cultural and societal development, reviewing mankind's historical propensity for projecting human experience into a cosmic framework and the centuries-old relationship between astronomy and astrology, the result of which is the emergence of the age of science. Since then, he writes, the purpose of astronomy has been to observe celestial objects for the advancement of scientific knowledge, while astrology deals only in the possibility that celestial bodies influence events on Earth. Reed asserts that the movement away from an inward-looking, meaningful cosmos toward an outward-gazing, impersonal one is a shift that has had enormous repercussions in every aspect of human life. He points out that astrology provides a scheme in which the believer is an integral component of an animistic, cyclical universe. Conversely, the pursuit of science and astronomy is a mechanistic, linear activity, which seeks extrinsic answers in terms of precise relationships between sense perceptions. *Dark Sky Legacy* probes the divergent approaches to the universe that compel individuals and cultures to pursue astrology or astronomy, the intuitive or the analytical. Blending modern science, ancient science, mythology, history, literature, and naked-eye astronomy, and spiced with fascinating detail about astronomy, astrology, celestial mythology, and calendar development, the book is an engrossing study of the profound impact of mankind's relationship with the universe.

The Leader in Me Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about

the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

And the Category Is. Ricky Tucker, 2022-01-25 A 2023 Lambda Literary Award Finalist in Nonfiction An Electric Literature “Most Anticipated LGBTQ+ Book of 2022” Selection A love letter to the legendary Black and Latinx LGBTQ underground subculture, uncovering its abundant legacy and influence in popular culture. What is Ballroom? Not a song, a documentary, a catchphrase, a TV show, or an individual pop star. It is an underground subculture founded over a century ago by LGBTQ African American and Latino men and women of Harlem. Arts-based and intersectional, it transcends identity, acting as a fearless response to the systemic marginalization of minority populations. Ricky Tucker pulls from his years as a close friend of the community to reveal the complex cultural makeup and ongoing relevance of house and Ballroom, a space where trans lives are respected and applauded, and queer youth are able to find family and acceptance. With each chapter framed as a “category” (Vogue, Realness, Body, et al.), *And the Category Is* . . . offers an impressionistic point of entry into this subculture, its deeply integrated history, and how it’s been appropriated for mainstream audiences. Each category features an exclusive interview with fierce LGBTQ/POC Ballroom members—Lee Soulja, Benjamin Ninja, Twiggy Pucci Garçon, and more—whose lives, work, and activism drive home that very category. At the height of public intrigue and awareness about Ballroom, thanks to TV shows like FX’s *Pose*, Tucker’s compelling narratives help us understand its relevance in pop culture, dance, public policy with regard to queer communities, and so much more. Welcome to the norm-defying realness of Ballroom.

The Legacy of a Freedom School S. Adickes, 2005-11-11 In 1964, the Student Nonviolent Coordinating Committee decided to establish Freedom Schools as part of its Freedom Summer campaign in Mississippi. With a curriculum developed by dedicated educators, SNCC workers, and an equally dedicated staff of teachers and student volunteers, the schools provided a learning experience and teaching style that revealed to students who had known only the stay in your place experience of segregated education what schools should, and could, be. The achievements of the students involved in Freedom Summer lifted the expectations of students who followed them and hastened the end of segregated schools in Mississippi. In *Legacy of a Freedom School*, Sandra E. Adickes recalls her experiences working with the SNCC, reminding us all of the powerful Freedom Summer.

A Legacy of Learning David T. Kearns, James Harvey, 2010-12-01 What's wrong with America's schools? Why can't we fix them? How did we wind up with dropout rates of 25 percent and graduates who can barely read and write? Why does the

United States spend twice as much on education as the international average and wind up near the bottom of the barrel in global comparisons of student achievement? Why do we lag behind nations such as South Korea, Hungary, and Singapore? And how should we go about improving the situation? Answers to these questions lie at the heart of this volume. David T. Kearns and James Harvey contend we are fine-tuning failure. We have yet to break with the past in order to face a different and challenging future. Despite worshipping at the altar of local control we have managed to create cookie-cutter schools across the country. We have been sidestepping the transparent need for common expectations about what students should know and be able to do. Standards, the authors say, are not clear enough or high enough. Above all, we have met the enemy and it is us: all of us support change as long as someone else is changing. This book is a fascinating and provocative analysis of where we went wrong and what we need to do to get American education back on track. It defines the kind of education our kids deserve. It calls for a new definition of public education in which choice is taken for granted. And it outlines an action agenda to help parents and citizens make first-class schools truly their own. In the future, the authors argue, we should think of a public school as any other non-profit entity—capable of operating in the public interest free of the red tape now strangling public education. It should be paid for by the public and accountable to the public, with its charter or contract routinely revoked when it stops serving public purposes or fails to meet its performance goals.

Shift Ed David Houle, Jeff Cobb, 2011-04-04 Futurist David Houle and educational strategist Jeff Cobb assert that we already have the information and capabilities to make the necessary changes, and challenges us to take action now.

Stalin's Legacy Struan Stevenson, 2012-09-06 As undisputed leader of the Soviet Union, Joseph Stalin was directly

responsible for the deaths of up to 60 million of his fellow citizens, a truly horrific figure which confirms him as one of the most notorious mass murderers in history. But Stalin not only waged war against his own people he and his successors regarded nature as an enemy that could be overcome by the might of Soviet technology and the brute force of slave labour. The building of vast networks of canals and the diversion of major rivers has created untold environmental damage, whilst Soviet nuclear and biological weapons programmes contaminated vast areas and caused unimaginable agony for human and animal life. In this book Struan Stevenson travels to the former Soviet republics of Kazakhstan, Uzbekistan, Turkmenistan, Kyrgyzstan and Tajikistan. From the Semipalatinsk region of east Kazakhstan, where over 600 nuclear tests were carried out between 1949 and 1990, to the Aral Sea, the desiccation of which has reduced what was the world's fourth largest inland body of water to half the size it was just 50 years ago, he presents a grim catalogue of environmental catastrophe. As well as talking with those whose lives continue to be cruelly affected by this terrible legacy, he also meets those who are trying to deal with its wider consequences as it threatens to impact far beyond the steppes of Central Asia. Despite almost insurmountable challenges, however, there ultimately is a strong message of hope as both local and international organizations face up to the effects of disastrous and inhuman Soviet policies.
