The Art of Leadership Michael Lopp,2020-05-13 Many people think leadership is a higher calling that resides exclusively with a select few who practice and preach big, complex leadership philosophies. But as this practical book reveals, what's most important for leadership is principled consistency. Time and again, small things done well build trust and respect within a team. Using stories from his time at Netscape, Apple, and Slack, Michael Lopp presents a series of small but compelling practices to help you build leadership skills. You'll learn how to create teams that are highly productive, highly respected, and highly trusted. Lopp has been speaking and writing about this topic for over a decade and now maintains a Slack leadership channel with over 13,000 members. The essays in this book examine the practical skills Lopp learned from exceptional leaders—as a manager at Netscape, a senior manager and director at Apple, and an executive at Slack. You'll learn how to apply these lessons to your own experience.

Handbook of Episodic Memory Ekrem Dere,Alexander Easton,Lynn Nadel,Joseph P Huston,2008-09-04 Episodic memory is the name of the kind of memory that records personal experiences instead of the mere remembering of impersonal facts and rules. This type of memory is extremely sensitive to ageing and disease so an understanding of the mechanisms of

episodic memory might lead to the development of therapies suited to improve memory in some patient populations. Episodic memory is unique in that it includes an aspect of self-awareness and helps us to remember who we are in terms of what we did and what we have been passed through and what we should do in the future. This book brings together a renowned team of contributors from the fields of cognitive psychology, neuropsychology and behavioural and molecular neuroscience. It provides a detailed and comprehensive overview of recent developments in understanding human episodic memory and animal episodic-like memory in terms of concepts, methods, mechanisms, neurobiology and pathology. The work presented within this book will have a profound effect on the direction that future research in this topic will take. - The first and most current comprehensive handbook on what we know about episodic memory, the memory of events, time, place, and emotion, and a key feature of awareness and consciousness - Articles summarize our understanding of the mechanisms of episodic memory as well as surveying the neurobiology of episodic memory in patients, animal studies and functional imaging work - Includes 34 heavily illustrated chapters in two sections by the leading scientists in the field

The Supermarket Sorceress Lexa Roséan, 2015-10-06 Do you have a problem that needs fixing? A wish that needs granting? A desire for love, a need for protection, or maybe just great parking? Look no further than the local grocery store! Experienced psychic, witch, and high priestess Lexa Roséan offers spells for every occasion in this amusing, magically effective, and easy-to-follow guide. Formulating spells based on history and legend, Lexa tailors tried-and-true Ancient Magick to the modern reader, substituting hard-to-find wild ingredients with their supermarket counterparts, resulting in spells that are simple and inexpensive. By following some simple rules--performing spells at a certain time of month, using fresh ingredients, with a specific intent--Lexa makes it possible for even the most inexperienced spell caster to successfully perform magick and get results. The Supermarket Sorceress is the first in a series of four books offering spells and enchantments using simple grocery-store ingredients. Originally published in 1996, this updated version includes new and revised spells and an introduction looking back 20 years and reflecting on the circumstances that inspired the original publication and launched the Supermarket Sorceress identity.

Necessary Conditions Geoff Krall, 2018 Students do not experience math in a vacuum. The curriculum, the students' social and emotional well-being, and the teacher's expertise as a facilitator must all be attended to, and each interacts with the others. -Geoff Krall Math instruction in high school is often something of a grab bag, with schools jumping from curriculum to curriculum, lacking a guiding vision or continuity between years. No wonder so many students conclude, I'm

not a math person. Geoff Krall thinks that's a problem. And he's devoted his career to fixing it. Necessary Conditions posits for the first time a coherent approach to secondary math pedagogy. Krall identifies three essential elements that will open the door to math for all your students: academic safety, quality tasks, and effective facilitation. Krall takes readers into real middle- and high-school classrooms to see how teachers cultivate these three necessary conditions. With extensive examples, practical techniques and resources, and insightful analysis, this guide equips teachers to do the following: Design classroom experiences that increase engagement and build all students' identities as mathematicians. Create dynamic, high-quality lessons that include meaningful, efficient assessment. Facilitate routines and discussions that increase all students' access to conceptual mathematics. The biggest drivers of students' math experiences are their teachers. With Krall's guidance, you can help every student come to recognize that they are indeed a math person.

The Magical Reality of Nadia (The Magical Reality of Nadia #1) Bassem Youssef,Catherine R. Daly,2021-02-02 From Bassem Youssef, aka the Jon Stewart of the Arab World, and author Catherine R. Daly comes a hilarious and heartfelt story about prejudice, friendship, empathy, and courage. Nadia loves fun facts. Here are a few about her: • She collects bobbleheads -- she has 77 so far. • She moved from Egypt to America when she was six years old. • The hippo amulet she wears is ancient... as in it's literally from ancient Egypt. • She's going to win the contest to design a new exhibit at the local museum. Because how cool would that be?!(Okay, so that last one isn't a fact just yet, but Nadia has plans to make it one.)But then a new kid shows up and teases Nadia about her Egyptian heritage. It's totally unexpected, and totally throws her off her game.And something else happens that Nadia can't explain: Her amulet starts glowing! She soon discovers that the hippo is holding a helpful -- and hilarious -- secret. Can she use it to confront the new kid and win the contest?From The Daily Show comedian Bassem Youssef and author Catherine R. Daly comes a humorous and heartfelt story about prejudice, friendship, empathy, and courage.Includes sections of black-and-white comics as well as lively black-and-white illustrations throughout.
