*Proceedings of The Focus Conference (TFC 2022)* Manyane Makua, Mariam Akinlolu, Mashango Sithole, Phiwayinkosi Gumede, Cebo Nyondo, 2023-02-08 This is an open access book. It is a common cause globally that the abrupt emergence of Covid-19 wreaked havoc in all sectors, including the higher education system. The sudden closure of campuses as a social distancing measure to prevent community transmission has shifted face-to-face classes to online teaching and learning, a transformative experiment for academics and students in most institutions. This has thrown the focus on utilising Learning Management Systems (LMS), eLearning tools and platforms for effective student engagement, which may have limitations of accessibility and affordability for many students. The pandemic has exposed the shortcomings of the current higher education system and the need for more training of academics and practitioners in digital technology to adapt to the rapidly changing educational climate. In the post-pandemic situation, eLearning and virtual education may become an integral part of the higher education system, hence the question of re-inventing higher education. The higher education institutions and universities need to plan the post-pandemic education and research strategies to ensure student learning outcomes and standards of educational quality. With the move to online teaching and learning, subsequently, traditional assessments followed and were adapted and adopted for online assessment. Assessments lie at the heart of the teaching process. It shapes students' understanding of the curriculum and determines their ability to progress. Reflections on assessments during Covid-19 abounded with the challenges that both academics and students faced regarding online assessments, including cheating and quality assurance issues. The focus on quality extended to the quality of teaching and learning in general. Moreover, the pandemic brought about the question of staff and student health and psychosocial support also became important. For academics, the abrupt shift to adapt to working from home and implementing online learning has led to over-work, low work-life balance and compromised mental health. With a view on constructive and futuristic discourse, the sub-themes of the 2022 Focus conference encapsulate the current realities in the higher education sector and beyond. It further provides opportunities for an in-depth analysis based on the benefit of hindsight and foresight. The Organising Committee specifically coined the theme, Re-inventing higher education: Insights, trends and lessons learnt from, specifically for the conference to reflect on and address the matters mentioned earlier. Academics, scholars, and practitioners in the higher education sector are called upon to share their research and express their perspectives on the reinvention of higher

education.

**Proceedings of the 10th Focus Conference (TFC 2023)** Manyane Makua, Mariam Akinlolu, Mashango Sithole, Phiwayinkosi Gumede, Cebo Nyondo, Ntombikhona Khuzwayo, Mandlenkosi Mhlongo, 2023-12-05 This is an open access book. The 2023 Focus Conference will focus on Goal Four (Quality Education) of the United Nations (UN) Sustainable Development Goals (SGD). Goal Four is seized with providing “equal access for all women and men to affordable and quality technical, vocational and tertiary education including university.” Quality education, in this context, means the ability to function, provide and derive value in society. The theme of the conference is therefore coined as “The Role of Higher Education in the Attainment of Sustainable Quality Education.” Through this theme, the conference will provide a space for participants to share practical knowledge, experiences, and possible solutions to the myriad of problems that confront the higher education sector. Universities are often thought of as ivory towers far removed from the realities that confront global societies. To compound this, higher education is increasingly being questioned for its relevance in providing practical and innovative solutions to existing societal problems. Such questions often navigate around the relevance of the academic programmes being offered, curriculum, the capacity of staff, employability of graduates, and generally the ability of these institutions to understand why they exist. Indeed, higher education’s role in creating a sustainable future will presumably take on greater importance as the world continues to become increasingly globalised and interdependent.

*Achieving the Impossible...with God* Lorene Moothart, 2019-01-13 TOCCOA FALLS, GEORGIA “Where Character is Developed, with Intellect” DR. R. A. FORREST (about whom this book is written) and the Toccoa Falls Institute are, in a sense, synonymous. He it was who breathed into the school the breath of life; he has been its mainstay throughout its forty-five years of existence; and he is still exerting a guiding and steadying influence in shaping its destiny. For those of you who may first become acquainted with this Christian school through the pages of this book, the following brief resume is presented. THE TOCCOA FALLS INSTITUTE was begun in 1911 to offer educational opportunity to young people who perhaps became Christians after reaching maturity and who desired training to fit them to become Christian workers. Today the school has a four-year high school course, a vocational course, a commercial department, and a four-year Bible course—offering the degree Bachelor of Arts in Biblical Education. The Institute helps to develop the character and intellect

of hundreds who come from all parts of the United States and other countries, enabling them to become good citizens and fruitful servants for the Lord around the world. The sun never sets on the work of former students and graduates of Toccoa Falls.

Student Research for Community Change William Tobin,Valerie Feit,2020-07-03 New research points to the future of education as online, student-centered, collaborative, and community-based--all largely absent from today's educational landscape. This timely guide shows middle, high school, and college students how to undertake research to address challenges in their curriculum and communities. The approach is deliberately designed to make it easy to bring ethical thinking and analytical problem solving to the social studies and STEM curricula, as well as to experiential and inquiry-based learning such as project-based and service learning. Organized around the steps in the social science research method, each step can be linked to curriculum and national standards and taught individually as stand-alone lessons or sequentially as part of a semester or yearlong research seminar. The text includes sample lesson plans, assignments, research questions, research tools, and research reports, as well as examples of concrete policy implementation and the kinds of evidence that can be used to assess and evaluate student work. Book Features: Combines research and citizenship so students can bring knowledge to bear on the most important challenges facing them. Designed for use with diverse students in inclusive classrooms. Developed in a university setting and field tested for over a decade in high schools. Connects K-12 to college and career in an organic and substantive manner. *Innate* Kevin J. Mitchell, 2020-03-31 What makes you the way you are--and what makes each of us different from everyone else? In *Innate*, leading neuroscientist and popular science blogger Kevin Mitchell traces human diversity and individual differences to their deepest level: in the wiring of our brains. Deftly guiding us through important new research, including his own groundbreaking work, he explains how variations in the way our brains develop before birth strongly influence our psychology and behavior throughout our lives, shaping our personality, intelligence, sexuality, and even the way we perceive the world. We all share a genetic program for making a human brain, and the program for making a brain like yours is specifically encoded in your DNA. But, as Mitchell explains, the way that program plays out is affected by random processes of development that manifest uniquely in each person, even identical twins. The key insight of *Innate* is that the combination of these developmental and genetic variations creates innate differences in how our brains are wired--differences that impact all aspects of our psychology--and this insight promises to transform the way we see the interplay of nature and nurture. *Innate* also explores the genetic and neural underpinnings of disorders such as autism, schizophrenia, and epilepsy, and how our understanding of these conditions is being revolutionized. In addition, the book examines the social and ethical

implications of these ideas and of new technologies that may soon offer the means to predict or manipulate human traits. Compelling and original, *Innate* will change the way you think about why and how we are who we are.--Provided by the publisher.

**U. S. News and World Report Ultimate College Guide** U.S. News & World Report (Firm),2007-10 In the simplest of terms, leadership is about influencing people to achieve an objective that is important to the leader, the group, and the organization. Strong leadership encourages subordinates to go beyond the obligation to obey and commit to the mission in a way that maximizes their potential. *The Military Leadership Handbook* is a concise and complete manual that identifies, describes, and explains all those concepts, components, and ideas that deal with, or directly relate to, military leadership. The book is a comprehensive compendium that focuses on, among other subjects, cohesion, command, cultural intelligence, discipline, fear, and trust. this applied manual provides invaluable assistance to anyone who wishes to acquire a better understanding of both the theory and application of military leadership
