Enough Roger Thurow,2010 For more than thirty years, humankind has known how to grow enough food to end chronic hunger worldwide. Yet while the "Green Revolution" succeeded in South America and Asia, it never got to Africa. More than 9 million people every year die of hunger, malnutrition, and related diseases every year - most of them in Africa and most of them children. More die of hunger in Africa than from AIDS and malaria combined. Now, an impending global food crisis threatens to make things worse. In the west we think of famine as a natural disaster, brought about by drought; or as the legacy of brutal dictators. But in this powerful investigative narrative, Thurow & Kilman show exactly how, in the past few decades, American, British, and European policies conspired to keep Africa hungry and unable to feed itself. As a new generation of activists work to keep famine from spreading, Enough is essential reading on a humanitarian issue of utmost urgency.

Abecedarian Craig T. Ramey,Joseph Sparling,Sharon L. Ramey,2012-01-01 This is a history and practical guide about The Abecedarian Project, an early education experiment launched in 1971 and then replicated in multiple other studies. The Abecedarian Approach is evidence-informed and total child in the way it promotes learning and positive academic and social outcomes for children who begin life at risk due to social or biological factors. The Abecedarian Project is a landmark study conducted in Chapel Hill, North Carolina with 111 children born into extremely impoverished life circumstances. The intervention involved intensive learning and social-emotional supports, starting in infancy and continuing until at least kindergarten entry, for children and their families. For the first-time ever, this book brings together all of the key details of this scientific and educational project so that community leaders, educators, policymakers, and parents know exactly what the Abecedarian Approach means. This book provides a down-to-earth blueprint for how to use and adapt the Abecedarian Approach for different groups of children and families living in many diverse communities in today's rapidly changing world. The book emphasizes how to actively engage young children and their families so that children receive the full range of enriching, growth-promoting experiences they need to be well-prepared for school entry and later achievement in academic and personal-social areas. The Abecedarian Approach has been used successfully in center-based care, home visiting programs, family day homes, and public school pre-K settings. Today, the Abecedarian Approach is one of the few evidence-based, proven programs that integrates basic principles of human learning and development into a fun, affordable, and effective approach to early childhood education. Reviews for the book include:For the first time, by the foremost scholars and

originators of Abecedarian, we have a top-notch, thorough review of its efforts and accomplishments that is both comprehensive and comprehensible. Laden with the extraordinary insight and vision that characterizes Abecedarian itself, this volume retells the inside story of America's leading effort to implement and evaluate our nation's premier program for young children and families. Practitioners, policy makers, and scholars will find this an outstanding, eminently usable, and indispensable recapitulation of what we thought we knew....but didn't really!!! It's the inside take on a national effort in which we all should take great pride. -Sharon Lynn Kagan, EdD, Virginia and Leonard Marx Professor of Early Childhood and Family Policy; Co-Director, National Center for Children & Families; Professor Adjunct, Yale Child Study Center, Yale University
Abecedarian: The Ideas, the Approach, and the Findings is a book of enormous historical and contemporary significance because it clearly provides the why and the what behind the findings of Abecedarian's remarkable success in helping children thrive. It is must reading for every early childhood educator and for all who care about children's futures. - Ellen Galinsky, President, Families and Work Institute; Author, Mind in the Making Over the past few decades, the findings from the Abecedarian Project have been so useful in educating legislators and the business community about the importance of high quality programs and supports for young children and their families. Now, educators and researchers get to hear the whole story surrounding the approach and research. If policymakers, including legislators and school board members, would read and act upon what they learn from this book, our youngest, most venerable children would all have a chance to be successful in life. A MUST READ for all of us! -Kathy R. Thornburg, PhD, Director, Center for Family Policy & Research, University of Missouri

Operations Management in Automotive Industries Marco Gobetto,2013-10-23 This book has proved its worth over the years as a text for courses in Production Management at the Faculty of Automotive Engineering in Turin, Italy, but deserves a wider audience as it presents a compendium of basics on Industrial Management, since it covers all major topics required. It treats all subjects from product development and “make or buy”-decision strategies to the manufacturing systems setting and management through analysis of the main resources needed in production and finally exploring the supply chain management and the procurement techniques. The very last chapter recapitulates the previous ones by analysing key management indicators to pursue the value creation that is the real purpose of every industrial enterprise. As an appendix, a specific chapter is dedicated to the basics of production management where all main relevant definitions, techniques and criteria are treated, including some numerical examples, in order to provide an adequate foundation for understanding the other chapters. This book will be of use not only to Automotive Engineering students but a wide range of readers who wish to gain insight in the world of automotive engineering and the automotive industry in general.
