**Empowering Student Researchers** Bethanie Pletcher, Faye Bruun, Rosa Banda, Krystal Watson, Angela Perez, Alissa Mejia, 2021-10-05 This yearbook is a project of the Consortium for Educational Development, Evaluation and Research (CEDER), the research and development arm of the College of Education and Human Development at Texas A&M University-Corpus Christi. With this edition of the CEDER Yearbook, the editors wished to support student researchers as emerging scholars. Participating in research projects entails many benefits for students, including the onboarding of new teaching methods and strategies, becoming a reflective practitioner, engaging in a different model of professional learning, learning how to behave like a researcher, improving writing skills, and pursuing further degrees. Collaboration between faculty members and students (often teacher or pre-service teacher researchers) is critical (Brew, 2013; Johnson, 2000; Ries, 2018). Strickland (1988) posits that teacher researchers need to be engaged in every step of the research process and allowed to take ownership of the work. It should be thought of as helping to create lifelong researchers, for if students are properly trained, prepared, and supervised, the student-faculty collaboration can be a memorable and successful experience. It may even inspire the career goal of a future professor or two (Fenn, 2010, p. 259). The call for proposals asked for empirical, conceptual and theoretical contributions to the area of research conducted by students. Personal Perspectives and Research Focus of students include the following categories: Culture, International Students, Men of Color, Teaching, Doctoral Students, Latino/a Culture, STEM, LGBTQ, Policy and Administration, Student Faculty, and Curriculum. The intended audience for this yearbook includes educators, decision-makers, policymakers, and leaders within faculty and student development programs as well as international student departments. A call for proposals was issued to a variety of universities and professional organizations. Two hundred and sixty-four articles from a total of 217 authors representing 72 universities were submitted. Those blinded articles were distributed to a panel of reviewers. Each article was seen by two

reviewers and the editors of the yearbook. The editorial team selected 21 articles for inclusion in this yearbook.

Becoming Hispanic-Serving Institutions Gina Ann Garcia, 2019-03-12 How can striving Hispanic-Serving Institutions serve their students while countering the dominant preconceptions of colleges and universities? Winner of the AAHHE Book of the

Year Award by the American Association of Hispanics in Higher Education Hispanic-Serving Institutions (HSIs)—not-for-profit, degree-granting colleges and universities that enroll at least 25% or more Latinx students—are among the fastest-growing higher education segments in the United States. As of fall 2016, they represented 15% of all postsecondary institutions in the United States and enrolled 65% of all Latinx college students. As they increase in number, these questions bear consideration: What does it mean to serve Latinx students? What special needs does this student demographic have? And what opportunities and challenges develop when a college or university becomes an HSI? In *Becoming Hispanic-Serving Institutions*, Gina Ann Garcia explores how institutions are serving Latinx students, both through traditional and innovative approaches. Drawing on empirical data collected over two years at three HSIs, Garcia adopts a counternarrative approach to highlight the ways that HSIs are reframing what it means to serve Latinx college students. She questions the extent to which they have been successful in doing this while exploring how those institutions grapple with the tensions that emerge from confronting traditional standards and measures of success for postsecondary institutions. Laying out what it means for these three extremely different HSIs, Garcia also highlights the differences in the way each approaches its role in serving Latinxs. Incorporating the voices of faculty, staff, and students, *Becoming Hispanic-Serving Institutions* asserts that HSIs are undervalued, yet reveals that they serve an important role in the larger landscape of postsecondary institutions.

*An Introduction to Formal Logic* Peter Smith, 2003-11-06 Formal logic provides us with a powerful set of techniques for criticizing some arguments and showing others to be valid. These techniques are relevant to all of us with an interest in being skilful and accurate reasoners. In this highly accessible book, Peter Smith presents a guide to the fundamental aims and basic elements of formal logic. He introduces the reader to the languages of propositional and predicate logic, and then develops formal systems for evaluating arguments translated into these languages, concentrating on the easily

comprehensible 'tree' method. His discussion is richly illustrated with worked examples and exercises. A distinctive feature is that, alongside the formal work, there is illuminating philosophical commentary. This book will make an ideal text for a first logic course, and will provide a firm basis for further work in formal and philosophical logic.

*Trout Culture* Jen Corrinne Brown, 2015-05-01 From beer labels to literary classics like *A River Runs Through It*, trout fishing is a beloved feature of the iconography of the American West. But as Jen Brown demonstrates in *Trout Culture: How Fly Fishing Forever Changed the Rocky Mountain West*, the popular conception of Rocky Mountain trout fishing as a quintessential experience of communion with nature belies the sport's long history of environmental manipulation, engineering, and, ultimately, transformation. A fly-fishing enthusiast herself, Brown places the rise of recreational trout fishing in a local and global context. Globally, she shows how the European sport of fly-fishing came to be a defining, tourist-attracting feature of the expanding 19th-century American West. Locally, she traces the way that the burgeoning fly-fishing tourist industry shaped the environmental, economic, and social development of the Western United States: introducing and stocking favored fish species, eradicating the less favored native "trash fish," changing the courses of waterways, and leading to conflicts with Native Americans' fishing and territorial rights. Through this analysis, Brown demonstrates that the majestic trout streams often considered a timeless feature of the American West are in fact the product of countless human interventions adding up to a profound manipulation of the Rocky Mountain environment.

**The Learning Wheel** Deborah Kellsey, Amanda Taylor-Beswick, 2016-12-07 Given the influence of digital technologies on

the world at large education and educators are yet again being forced to consider their educational practices. Not all educators have been socialised professionally to use technologies and therefore knowledge gaps exist. This book adds to emerging conversations about the use of technologies to support and indeed replace traditional teaching methodologies in a range of educational settings. It offers an example of innovative approach 'LearningWheel' to bridge the afore mentioned knowledge gap and provides an opportunity for readers to engage with technologies for teaching and learning purposes. Beginning with an outline of how technologies are shaping the learning landscape more broadly each subsequent chapter takes on a layer of the LearningWheel and sets it in context from a theoretical position. An example wheel is included in each chapter, as are stop and pause questions to prompt educators to engage with the content in a very real sense. By the end of the book readers will have had the opportunity to connect with the LearningWheel (VCoP) in the development of a Learning Wheel unique to this book.
